PROFESSIONAL SUMMARY

Computer Science Engineering student specializing in Data Science with strong interest in Software Development, Machine Learning, and Cybersecurity. Experienced in building ML-based prediction systems, cybersecurity dashboards, and full-stack web applications using Python, JavaScript, and modern development tools.

TECHNICAL SKILLS

Languages	: Python, Java, SQL, JavaScript
Web Development	: HTML, CSS, React.js, Node.js, Express.js
Machine Learning & Data Analytics	: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
Cybersecurity & Networking	: Network Monitoring, Intrusion Detection Concepts, Packet Analysis, RBAC
Databases & Tools	: MongoDB, SQLite, Git, GitHub, Streamlit, VS Code
Core Concepts	: Data Structures & Algorithms, OOPs, DBMS, Operating Systems, Computer Networks

PROJECTS

1. Employee Attrition Prediction System

Python, Streamlit, Scikit-learn, Pandas, Matplotlib, Seaborn

 - Developed a machine learning-based employee attrition prediction system using the IBM HR Analytics dataset with 1400+ employee records and 35+ features.
 - Performed EDA, data preprocessing, and feature engineering to identify key factors influencing employee attrition.
 - Trained and evaluated multiple models including Logistic Regression, Random Forest, and Gradient Boosting; Random Forest selected as the best model based on recall.
 - Built an interactive Streamlit dashboard for risk prediction, model comparison, feature importance visualization, and confusion matrix analysis.
2. RAKSHAK – Enterprise Endpoint Detection & Response (EDR) Platform

Python, Flask, SQLite, Scapy, JavaScript

 - Designed and developed a cybersecurity-themed SOC dashboard for real-time threat monitoring and incident response workflow.
 - Integrated role-based access control (Admin, Analyst, Cisco Engineer, Viewer) for multi-role SOC operations.
 - Visualized and monitored threats including ARP spoofing, port scans, ICMP floods, brute-force attacks, and suspicious traffic patterns.
 - Implemented host telemetry monitoring, threat logging, severity classification, and incident response actions such as block IP, quarantine, investigate, and resolve.

3. PrepWise AI – AI-Powered Interview Preparation Platform

React.js, Node.js, MongoDB, JavaScript
- Building an AI-powered platform that generates technical interview questions, analyzes resumes, and provides personalized learning recommendations.
 - Developed features including user authentication, dashboard analytics, DSA progress tracker, and mock interview module.
 - Integrated AI APIs (Gemini Free API) for dynamic question generation and resume skill extraction.
 - Implemented RESTful APIs with Node.js and stored user data in MongoDB.

EDUCATION

GLA University, Mathura

2024 – 2028

B.Tech in Computer Science Engineering (Data Science)

CGPA: 6.4

- CERTIFICATIONS
- NPTEL Certification in Software Engineering
 - NPTEL Certification in Environmental Engineering

- LEADERSHIP & ACTIVITIES
- Served as Class Representative (CR) at GLA University.
 - Collaborated on multiple academic and technical team projects.
 - Actively involved in learning and building projects in Machine Learning, Web Development, and Cybersecurity.
